

Fabric Shield RTU

Premium water based upholstery protector

Fabric Shield RTU is an advanced water based fluorochemical polymer providing premium protection against spills and stains. It has been professionally formulated to create a durable, highly repellent property to each fibre which

holds spills and stains at the surface and enables them to be removed before causing permanent staining.

BENEFITS

- **Advanced Protection** – Modern fluorochemical polymer technology provides premium protection against water based stains, oil based stains and general grime.
- **Red Stain Protection** – Specialty stain blockers provide added protection against acid dye stains caused by red cordial spills.
- **Versatile** – Protects against food & beverage spills and hair & body oils.
- **Makes Cleaning Easier** – Makes routine upholstery cleaning by wet extraction significantly more successful as the soiling is released quicker and easier.
- **Low VOC** – Water based low VOC Formula
- **Wide Usage** – Safe for use on all water cleanable fabric, drapes, table cloths and upholstery.

DIRECTIONS for USE

Always pre-test in an inconspicuous location for substrate sensitivity to chemicals.

Ensure that the fabric is clean and free of chemical residue.

Can be applied to dry or damp fabric.

Coverage: Approximately 1Lt per 5 seater lounge or 5m².

Application:

1. Ready to use - no mixing required.
2. Spray Fabric Shield RTU from 25 to 30cm away from the upholstery using smooth back and forth motion overlapping slightly. Fabric should be wetted. Do not over apply.
3. Brush with a soft brush to spread protector evenly.
4. Align fabric and speed dry.

Sprayer Recommendation:

Use a low pressure sprayer with a 65015 jet up to 60psi. Dedicate sprayer to Fabric Shield RTU.

PRODUCT SPECIFICATIONS

Product code: AP472

pH: 7.0 RTU
